

RYANBEN GACHAHI

EXPERIENCE

January 2025 - Current

Software Engineer (Projects & Academic Experience) Independent |
Kenya, Kenya

- Designed and implemented multiple full-stack web applications using React, Node.js, and FastAPI
- Applied Agile workflows and task tracking using Jira to manage development cycles
- Integrated frontend components with RESTful APIs and backend services
- Debugged and optimized application logic for better performance and maintainability

EDUCATION

Expected in December 2028

Bachelor of Science | Computer Science

Mount Kenya University

GPA: true

November 2025

Certificate in Software Engineering

Moringa School, Nairobi Kenya

Completed an intensive, industry-focused program covering full-stack development, algorithms, and collaborative software engineering practices.

- Capstone Projects: A Hospital management system, a ticket booking system.
- Major in: Full Stack Development

PROJECTS

- **AgroLink** - Farmer-Buyer Marketplace Platform, designed and developed a web-based platform that connects farmers directly with buyers to improve market access and reduce intermediaries, implemented product listings, basic search and filtering, and responsive user interfaces optimized for usability and accessibility
- **Health Habit Tracker with Streaks** - Built a habit-tracking application that enables users to track daily health routines, maintain streaks, and visualize progress over time. Implemented state-driven logic to encourage consistency and long-term user engagement.
- **Smart Goal Planner** - developed a goal management system with full CRUD functionality using React and a JSON-based backend Focused on scalable component architecture, clean UI design, and maintainable state management. React blog platform, created a component-based blog application featuring dynamic content rendering, estimated reading

PERSONAL SUMMARY

Accomplished Software Engineer specializing in full-stack development with React and Node.js. Demonstrated expertise in Agile methodologies and RESTful API integration, SEO, leading to optimized application performance. Strong problem-solving skills drive successful project outcomes and enhance user experiences.

SKILLS

- JavaScript
- Java (Basics)
- Tailwind
- Python
- PHP
- Java
- HTML and CSS
- SQL
- JSON server
- Jira and Agile methodologies
- Version control
- React
- Next's
- Node.js
- FastAPI
- Git and GitHub
- RESTful APIs
